The University of California, Berkeley, solicits applications for a tenure and tenure-track position beginning in the Fall of 2006. Candidates are sought in the fields at the intersection of nanoscale science and engineering and its implications for energy and the environment. Topics of interest include but are not limited to: nanoscale science and engineering for energy conversion, storage, transmission, and fuel processing; properties of nanomaterials that impact health and the environment; and devices and systems based on nanoscale science and engineering for monitoring and improving environmental quality.

This faculty search will be conducted under the auspices of the Berkeley Nanosciences and Nanoengineering Institute. Candidates from a wide range of disciplines (physical sciences, engineering, chemistry, public health, etc.) are invited to apply. The successful candidate will have the opportunity to interact with scientists and engineers across a wide spectrum of disciplines, and to help develop the new interdisciplinary initiative in nanoscale science and engineering. Applicants should send a complete curriculum vitae, a selection of publication reprints (five or less), a brief statement of future research plans and teaching interests, and arrange for three letters of reference to be sent directly to the address below. All correspondence will be handled in accordance with the UC Berkeley Statement of Confidentiality found at: http://apo.chance.berkeley.edu/evalltr.html.

Applications should be sent to: Chair, Faculty Recruitment Committee; Berkeley Nanosciences and Nanoengineering Institute, c/o Department of Chemistry; D58 Hildebrand Hall, University of California; Berkeley, CA 94720. The deadline for receipt of applications, including references, is February 15, 2006, but the search committee will begin interviewing candidates on January 15, 2006. The University of California is an Equal Opportunity/Affirmative Action Employer.
